

LAB: Practice Radical Equations

Use the Graphing Calculator

Name _____

<p>1. Solve algebraically:</p> $4 = \sqrt{2x + 3}$	<p>Check(s):</p>	<p>Graph each side of the equation. Label the intersection(s).</p> 
<p>2. Solve algebraically:</p> $x + 2 = \sqrt{3x + 16}$	<p>Check(s):</p>	<p>Graph each side of the equation. Label the intersection(s).</p> 

<p>3. Solve algebraically:</p> $x - \sqrt{x + 4} = 2$	<p>Check(s):</p>	<p>Graph each side of the equation. Label the intersection(s).</p> 
<p>4. Solve algebraically:</p> $x - 1 = \sqrt{x + 5}$	<p>Check(s):</p>	<p>Graph each side of the equation. Label the intersection(s).</p>
